PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building responsive, user-friendly web interfaces and scalable server-side systems using the MERN stack. Skilled across the full development lifecycle, from translating UI designs into polished, accessible interfaces to architecting RESTful APIs, managing databases, and deploying cloud-ready applications. Strong collaborator with a focus on clean, maintainable code and end-to-end user experience.

CORE COMPETENCIES

- Building responsive, accessible, and pixel-perfect user interfaces from design mock-ups using React.js and Next.js
- Architecting and consuming RESTful APIs and GraphQL endpoints for seamless frontend-backend integration
- Designing and managing MongoDB schemas for scalable, maintainable data layers
- Implementing reusable, component-driven frontend architectures to reduce development time and improve consistency
- Applying state management solutions (Redux, Context API) for predictable, maintainable application state
- Leveraging AI-assisted development tools (GitHub Copilot, Cursor, Claude) to accelerate coding, debugging, and code review workflows
- Collaborating in cross-functional teams using Git-based version control and modern development workflows

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++

Frontend Frameworks: React.js, Next.js, Redux, Context API

Styling & UI Libraries: Tailwind CSS, Bootstrap, shadcn/ui, HTML5, CSS3

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL

Database: MongoDB

Programming Foundations: Object-Oriented Programming (C++), Data Structures & Algorithms (C++)

UI Engineering: Responsive Design, Component-Driven Architecture, Pixel-Perfect UI Implementation

Performance & Quality: Frontend Performance Optimization, Reusable Component Systems, Scalable Frontend Architecture

Tools & Workflows: Git, GitHub, Modern Frontend Build Systems, Design-to-Code Workflows

AI-Assisted Development: GitHub Copilot, Cursor, Claude

EDUCATION

Bachelor of Software Engineering	2020 - 2024
University of Central Punjab, Lahore	

Advanced Web Engineering Certification	2025
National Vocational and Technical Training Commission (NAVTTTC)	

PROJECT

1. Simple Authentication

This authentication web application enables secure user registration, login, logout, password reset, email verification, protected routes, profile management, and session handling. It also includes form validation, secure authentication, and a responsive design to provide a safe and seamless user experience across devices.

2. Authentication with OTP

The application includes OTP (One-Time Password) authentication, adding an extra layer of security by verifying user identity through a temporary code sent during login or account verification. This helps ensure that only authorized users can access their accounts.

3. E-Commerce Frontend

The e-commerce frontend provides a modern and responsive shopping interface where users can browse products, view product details, search and filter items, add products to the cart, manage their wishlist, and enjoy a smooth and user-friendly shopping experience.

4. TODO

The To-Do application allows users to create, edit, delete, and organize tasks efficiently. It includes features such as marking tasks as completed, setting priorities, filtering tasks, and providing a simple, responsive interface for effective task management.

LANGUAGES & INTERESTS

Languages: English (Fluent), Urdu (Native), Punjabi (Native)

Software: Microsoft Word, Excel, PowerPoint

Interests: Learning new languages, travel, sports
